With 9,000 customers in more than 170 countries, SunSystems is a proven solution that helps you improve operating efficiencies and increase visibility into your financial information.

**SUNSYSTEMS**

**DO BUSINESS BETTER.**

Your financial organization faces greater challenges than ever before—and greater opportunities. You face increasingly complex regulations, volatile costs, and demands for improved performance, especially if you do business internationally. You’ve never been under greater pressure to do more with less. But you also have new opportunities—finance professionals can now make major contributions as strategic advisers and internal business consultants. That raises your importance as a financial executive and gives you a chance to add real value to your organization—if you have the right technology solution. With Infor™ FMS SunSystems, you get the tools to address your full range of financial management needs.

**LEVERAGE EXPERIENCE.**

When you work with Infor, you gain the benefit of decades of experience in building financial management solutions for companies just like yours. Our experts have implemented Infor FMS SunSystems at leading companies in more than 170 countries. We’ve helped thousands of business solve the problems that you face every day—let us do the same for you.

SunSystems gives you complete interoperability to seamlessly bridge the gap between your financial and operational systems. It also gives you the flexibility to address the constant but unavoidable changes you need to tackle to take advantage of new business opportunities. You’ll also get a complete, real-time view of all the moving parts that make your business tick and you’ll have a chance to turn financial information into profitable action.
GET BUSINESS SPECIFIC.

When you can see the impact of every financial transaction as well as the trends that may affect your business tomorrow, you’ll have a potent strategic advantage that benefits every aspect of your business. You’ll make better financial decisions with more confidence when you can rely on Infor FMS SunSystems to bring together your full range of business functions. This easy-to-use, fully-scalable, multi-language solution supports global operations and lets you see every detail of your financial operations.

Infor FMS SunSystems combines the power of an advanced general ledger system, accounts payable, asset registers, project management, cash management and other sophisticated financial management tools.

You get a range of powerful tools including:

Financial Management—You’ll be armed for faster, more effective decision making with Infor FMS SunSystems’ financial modules, which are specifically designed to give you immediate access to all finance and accounting information. That includes all aspects of financial management, including general ledger, accounts payable, accounts receivable, corporate allocations, consolidations, multi-currency, and fixed assets. All SunSystems solutions support multiple GAAP reporting requirements and help you keep your business IFRS compliant.

Business Reporting and Analytics—You’ll get comprehensive reporting and analysis capabilities through Infor FMS SunSystems’ tight integration with Infor FMS Query & Analysis (formerly Vision), which helps you to turn your data into meaningful information, then deliver that data to the right people, in the right format, at the right time. When you have these complete multi dimensional capabilities, standard best practice reports, and the ability to do ad-hoc reporting and analysis, you’ll gain unique insight into every aspect of your business that matters to you. Its integrated analytics infrastructure also streamlines reporting and analysis of data from third-party and legacy applications in your organization.

Purchase Management—You need tighter purchase control than ever before in today’s challenging economy and constantly changing business environment. Infor FMS SunSystems gives you a complete web-based spending control and management solution that you can deploy to large numbers of employees to improve visibility and control over purchasing activities. Employees can manage their own purchasing requirements and define rules and workflows that automate and help enforce corporate policies.

Order Management—Take control of your sales, purchasing, and inventory management operations with advanced order management features and integrate your operations with partners and customers across your value chain. Infor FMS SunSystems also lets you define custom process stages for purchasing, sales, and inventory movements. You can define the business sequence that transactions follow, provide for any associated documents, and make all necessary ledger and inventory updates.

Professional Services Automation—if your organization offers the services of skilled staff on a project basis, FMS SunSystems can accommodate sophisticated project accounting and costing requirements. It includes full professional services automation functionality for project accounting, resource management, billing, and web-based time and expense management. You’ll use staff better and increase revenue.

Financial Performance Management—Simplify your budgeting, forecasting, and other financial planning processes with SunSystems’ dashboards, scorecards, and other reports. The system generates, manages, and delivers critical business information to any number of business users across your enterprise. It also helps you make better decisions by delivering both financial and operational key performance indicators (KPIs) to managers at every level.

Move up to Infor FMS SunSystems 5.4

You’ll gain unprecedented flexibility and improved performance by upgrading to Infor FMS SunSystems 5.4. This award winning financial management solution takes advantage of Infor’s software expertise to bring you exciting enhancements and powerful new functions, including:

- Enhanced user interface. You’ll find the system even easier to use, thanks to its updated look and feel.
› Better system operability. You can directly query, create, or update data held in SunSystems 5.4 from other applications synchronously or asynchronously.

› Comprehensive security and administration. SunSystems 5.4 makes it much simpler for you to manage security, access, and authorization functions. Additional delegation of administrative rights, controls, enhanced audit, and other capabilities give you even greater security in a way that’s easy to manage.

› Enhanced performance, scalability, and platform support. SunSystems 5.4 scales to support large transaction volumes and hundreds of system users. It also supports all the latest standard technologies, such as Microsoft Windows 7, SQL Server 2008 R2, and Windows Server 2008 R2.

› Additional financial management functionality. SunSystems 5.4 also brings you a number of market and customer driven enhancements including additional currency capabilities, asset handling, order fulfillment, and other functionality to meet your most sophisticated financial management requirements.

SEE RESULTS NOW.

You’ll see an immediate return on your investment and lower total cost of ownership over the long term by upgrading to Infor FMS SunSystems 5.4. Designed to support and reinforce today’s best financial management practices and address your key challenges, SunSystems now requires less customization, shorter implementation time, and fewer IT resources to maintain. You can reconfigure the solution quickly to support changes in your financial processes and business operations. In one effective solution, you get everything you need to:

Cut costs and create efficiency—Infor FMS SunSystems helps you close your books faster and streamlines your reporting and planning cycle by giving you a single, integrated environment for financial management business processes.

Improve corporate performance—Make it easy for your users and stakeholders to understand how the business is performing with SunSystems’ real-time reporting and analysis. You can integrate finance and operational data to provide key business metrics to managers across your organization. Actionable ad-hoc reporting and analysis capabilities give decision makers the information they need to effectively manage the business. Greater visibility and transparency of data also helps you meet regulatory and other corporate governance demands.

Provide a consistent and auditable environment—You’ll find it easier to comply with local statutory, audit, IFRS, and other regulatory requirements because of SunSystems’ built-in audit trails, alerts and sophisticated data reconciliation functionality, and XML-based workflow.

Work globally—Infor FMS SunSystems give you built in multiple language, currency, and reporting capabilities (such as local statutory, corporate reporting, management reporting, and more), to support you wherever your business is today and wherever it will grow in the future.

Extend and elevate financial management—You’ll improve your ability to predict the impact of changes in your business conditions and strategy, and adjust your business accordingly. SunSystems’ integrated solutions for financial performance management and business analytics help your finance team shift its focus from transaction processing to decision support.

THERE IS A BETTER WAY.

At Infor, we work with a core belief. We believe in the customer. We believe that the customer is seeking a better, more collaborative relationship with its business software provider. And a new breed of business software: created for evolution, not revolution. Software that’s simple to buy, easy to deploy, and convenient to manage. Our 70,000 customers in more than 100 countries stand with us. We look forward to your sharing in the results of our belief. There is a better way. For additional information, visit www.infor.com.
